

Turn Asphalt Into Energy

Smart companies adapt their core competencies to new applications to stay competitive. Having supplied racking systems for 170MW of solar generation on over 1,200 projects, [hb Solar Canada](#) has introduced [SKYPORT](#), an engineered solution for solar parking lots. Included is an [NRGpilot portal](#) so owners can ensure their investment is generating maximum revenue while serving their customers. [Contact Cachelan](#) for an NRGpilot smart grid portal for applications like car ports, microgrids, net metering, IoT or EV charging.

For 500kW 175 car parking, use 13 of these 14 car 40kWac SKYPORT V sections. Other configurations available. Modular design scales to any size. Add optional EV charger stations.
